Education

Sakarya University, Bachelor's Degree

Faculty of Computer and Information Sciences, Computer Engineering Jun 2016

Bogazici University, Bachelor's Degree

Management Information Systems Jun 2011

Technical Skills

- C# .Net
- .Net MVC
- .Net MVC API
- .Net Core
- Python
- Web Development
- SQL Server
- Deep Learning
- Agile & DevOps
- Git/TFS

Professional Experience

MKM Computer Consulting and Training Services Company, Ltd.

Istanbul, Turkey

R&D Unit – Software Developer

Jun 2018 – Jan 2020

- Lead a team of 3 people to manage, develop, operate, designed architecture and fix bugs on a mobile game project (developed with Unity C# .Net and published for Android and iOS)
- Developed a module on real time multithreaded application (C# .Net). The module is based on Resource Management module on new generation NEC communication devices.
- Developed a RESTful API with ASP.NET MVC (Backend for Unity game project)
- Developed license server and fully customized encryption for game licenses (C# .Net – used AES for encryption)
- Developed various script (Bash scripts on Linux – PowerShell scripts on Windows)

Rofoods & Prohotech Professional Technologies, Ltd

Istanbul, Turkey

R&D Unit – Software Developer

Sep 2017-Jun 2018

- Developed an admin panel (.Net MVC) for micro markets. The admin panel includes real time sales and people on area. (Extended with Power BI)
- Developed real time customer analysis(Python). It gets a frame every second from security cameras and finds people and product on the market.
- Extended admin panel with Power BI charts for example; person related sales, most popular products and least sold products.

Licenses & Certifications

- Programming in HTML5 with JavaScript and CSS3, Microsoft Jan 2018
(Verified badge details on my LinkedIn account and can be verify on Microsoft)
- Software Development Specialist Training Program, Bilgeadam Jan 2017
(Details on my LinkedIn account)
- GDG DevFest Ankara 2016, Google Dec 2016

Volunteer Experiences

- Object Detection with Tensorflow(Python – Tensorflow), BilKamp 18 Apr 2018
(I gave 2 days of training in artificial intelligence and deep learning. I shared general information about the industry I worked with students interested in artificial intelligence.)
- Deep learning with Lua(Lua – Torch), BilKamp 17 Apr 2017
(I gave 2 days of training in Lua programming language and Torch machine learning library.)

Projects

- Reflections with Examples in C# .Net Jun 2020
(Details on my Github account)
- Role Based Claims Authorize .Net MVC 5 - Identity 2.2 Jul 2019
(Details on my Github account)
- E-Commerce Website with ASP.NET MVC Aug 2017
(Details on my Github account)
